LinkedIn: <https://www.linkedin.com/in/nayandeva/>

Email : nayandevakv147@gmail.com

Github : <https://github.com/nayandeva>

Mobile: +91 8129640998

SKILLS

Languages : Python, Java, C++, C, SQL

Tools/Platforms: Tableau, PowerBI, Excel, MySQL, Google Colab

Soft Skills : Problem-Solving, Analytical Thinking, Eagerness to Learn, Communication, Teamwork, Collaboration

PROJECTS

Indian Air Quality Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI | [Github](#) Sep' 26

- Built a data processing pipeline over air-quality records from 26 Indian cities (2015–2020), covering PM2.5, PM10, NO₂, SO₂, CO, O₃, NH₃, and AQI across multiple monitoring locations.
- Applied correlation, distribution, and outlier-detection techniques using Pandas, NumPy, Matplotlib, Seaborn, and Power BI to write clean, reusable analysis code and examine regional, seasonal, and yearly trends.
- Delivered data-driven insights on pollution-prone locations and periods to support environmental monitoring and policy planning.

AWS Auto Scaling Demo | AWS, EC2, Application Load Balancer, Auto Scaling | [Github](#) Jul' 26

- Deployed and integrated a cloud-based Node.js application on EC2, automating traffic distribution with an Application Load Balancer and Auto Scaling Group to handle variable workloads.
- Automated infrastructure scaling workflows using CloudWatch monitoring and custom scaling policies triggered by CPU utilization and demand.
- Improved system availability and resource efficiency by enabling the application to scale automatically during traffic spikes without manual intervention.

Watermark Pro | Python, Tkinter, Pillow | [Github](#) Jan' 26

- Designed and developed a desktop utility in Python for applying customizable text and logo watermarks to digital images, writing modular, maintainable code.
- Implemented drag-and-drop placement, opacity controls, live preview, and export functionality using Tkinter and Pillow.
- Debugged and refined the tool through iterative testing to improve usability for photographers, content creators, and small businesses.

TRAINING

Eduniketan Private Limited | Devops & Cloud Engineering | [Certificate](#) Jun' 26 – Jul' 26

- Designed and deployed a scalable web application infrastructure using AWS EC2, Application Load Balancer, Auto Scaling, and CloudWatch as part of a DevOps and cloud engineering training program.
- Implemented load balancing and Auto Scaling to efficiently distribute traffic across EC2 instances, configuring scaling policies to automate resource allocation based on application demand.
- Deployed a Node.js web application on AWS and used CloudWatch for monitoring, gaining hands-on experience in cloud infrastructure, automation, scalability, and system monitoring — core DevOps practices.

CERTIFICATES

Database Management System Part 1 | [Infosys](#) Aug' 26

Python Project | [Upgrad Campus](#) May' 26

Design and Analysis of Algorithm | [Upgrad Campus](#) May' 26

Data Structure | [Upgrad Campus](#) May' 26

Digital Systems: From Logic Gates to Processors | [Coursera](#) Oct' 25

EDUCATION

Lovely Professional University Phagwara, Punjab

Bachelor of Technology Aug' 24 – Present

Computer Science and Engineering(Data Science with Machine Learning) CGPA: 7.32

St. Joseph Higher Secondary School Thrissur, Kerala

Intermediate Percentage: 91% Jun' 22 – May' 24

St. Thomas Higher Secondary School Thrissur, Kerala

Matriculation Percentage: 95% Jun' 22 – May' 24
